Party Print

A mobile imaging solution allowing users to wirelessly print and share photos !

Easy—Party Print allows event guests to easily transfer photos via Wi-Fi for **instant printing and sharing**. Download the free app, connect to the local Wi-Fi and print. It's that simple.

Fun—Party Print is the modern version of free film cameras on the table. Event guests use their mobile devices to **capture memorable "candid" shots**.

Versatile—With DNP's Party Print **customised borders** can create a lasting memory of the event on each print.

Archive—Party Print **archives all of the images** that it prints. Event hosts can receive copies of the digital files.

Party Print is a new mobile imaging solution from DNP for event photographers.

- Install Party Print on a compatible Window's PC, configure your Wi-Fi router.
- Connect a DNP printer and you are ready to go.

Party Print makes a great rental solution for parties, wedding receptions or other hospitality events.

From click to print in less than 11 seconds.
